

List of student posters (alphabetically)

Bachelor Theses

1.	Lukáš Hejcman	Fingerprinting and Identification of TLS Connections
2.	Andrej Lukacovic	Classification of network traffic transmitted using QUIC protocol
3.	Martin Stahl	Personal GPS locator built using Arduino platform and controlled by SMS commands
4.	Michal Žůrek	Smart Monitoring System
13.	Jakub Zahradník	Smart Mirror Prototype

Master Theses

5.	Francesco Angione	A novel System Level Test approach targeting System-on-Chip Interconnections to Memories
6.	Petr Heřmánek	Device for Wi-Fi Security Testing
7.	Giorgio Insinga	An Effective and Efficient Method for Collecting Diagnostic Information during FLASH Memory Testing
8.	Zuzana Jiráňková	Hardware tool for precise targeting of the camera view in the room
9.	Petr Kolář	Autonomous Car Model Control
10.	Libor Kuchař	Datalogger for ionizing radiation spectrum measuring equipment
11.	David Pokorný	Side-channel analysis of post-quantum digital signature Rainbow
12.	Kryštof Vaněk	Modular multi-channel capacitive soil moisture measurement system
